-----

**Power BI Child role Business Justification:**

Working in FMS IBM Power BI team, to support the application need this role. Please approve the request.

**Changing IMDL Roles :**

If you want to change the related IMDL role name, then you need to raise another SRQ to ISDM IMDL.

[Implementing ROW LEVEL SECURITY - STATIC vs. DYNAMIC RLS | Power BI \(youtube.com\)](#)

Dear Help Desk,

The report refresh is regular and working fine. This is related to an application issue and the Power BI infrastructure team doesn't have any access or scope to solve the issue. Please check the below information and contact the user and Dataset owner to identify the application team for the issue and assign to that team.

Workspace Name:OPS Sustainability\_Global\_BOS\_PRD

Report name: BOS\_Report

Dataset Owner: mdylak@PMINTL.NET (Dylak, Mateusz (contracted) )

Reason for Return to HD : It's a development related issue, user not able to see the correct data in the report. Dataset owner can help on this issue, hence returning to HD. Can you please assign this to the Developer Team, so they can help user to resolve the issue.
